

Splicing Cabinet

Vertical Hyperscale eXchange Cabinet (V-HSX)

The V-HSX is designed for wall mount application and serves as the transition point between ultra high fiber count (UHFC) outside plant cables and indoor distribution cables. The work platform has multiple mounting locations to conveniently access each splice tray module. Our V-HSX is focused on high workability.

Features

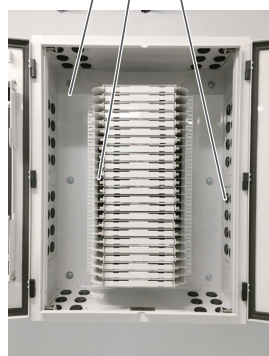

» High capacity (10,368f)

» Flexible

» User friendly

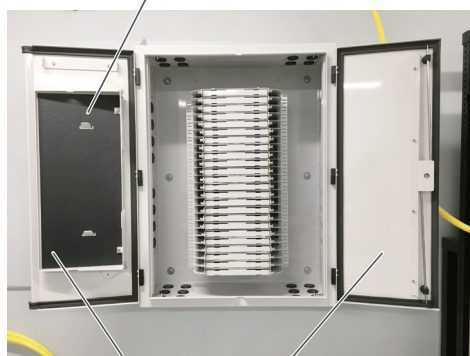

Flexible

Cable Entry & Distribution
(Top, Bottom or Sides)

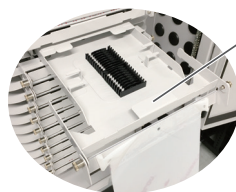

User friendly
